

## **Mayor's Report 7\_6\_2023**

### **Containerization Ordinance**

While I initially sponsored this ordinance, I no longer support it. The amendments made to the ordinance at the last Assembly Meeting render it essentially useless, so I suggest tabling it indefinitely or voting it down outright.

I'm working on an alternative plan regarding bulk ore exports that I plan on introducing at the July 20 Assembly meeting.

### **Public Records Requests from Assembly Members**

I attached a memo on this topic that will hopefully help everyone better understand the issue and how other municipalities handle these requests.

### **Great 4th of July Celebration**

Thanks to everyone who worked so hard to put together such a fun and memorable Fourth of July celebration. I especially want to thank the MOS staff including the Visitor Department, Police and Fire Departments, and Public Works. Also, big thanks to Spencer Morgan for his incredible fireworks show.

### **Dyea Land Management and Boundaries**

These code changes are necessary to clarify code and clearly delineate boundaries between Dyea, West Creek, and Nahku Bay. I worked closely with the Borough Attorney and Deputy Manager Deach to put this Ordinance together and I urge the Assembly to approve.
